

Message from the Dean Sikkim Manipal Institute of Medical Sciences

Sikkim Manipal Institute of Medical Sciences was established in 2001 to provide affordable and world class Medical Education, quality medical care in both student and patient friendly atmosphere and in a spirit of compassion previously beyond the reach of those residing in Sikkim and North East India.

Although much has been done in field of education, it has taken more than decade for this university to start online Medical Journal in which articles will be authored by indigenous faculty, residents of SMIMS, medical students and health professionals for national and international faculty.

I hope that reading this inaugural edition will stimulate new ideas and new collaboration as we all work together to address health disparities and to improve global health.

I would like to extend my best wishes to the Editorial team.

Air Marshal (Retd.) G. S. Joneja, VM
Dean, SMIMS
